*Pricing is billed annually and in US dollars. Actual exchange rates may vary.

Sold Separately

Devolutions Launcher, User CAL and Privileged Access Management module are not included and need to be added to your DVLS subscription plan.

Devolutions Launcher

Devolutions Launcher allows you to easily open remote connections directly from the DVLS web interface.

Devolutions Launcher is \$174.99/user/year and includes one Launcher license AND one User CAL.

Client Access License (User CAL)

You will need to purchase one User CAL (Client Access License) per user accessing your Devolutions Server via the web application or Workspace browser extension.

User CAL is \$49.99/user/year and can't be shared.

Privileged Access Management **Module**

Unlock advanced privileged access management capabilities in Devolutions Server, such as:

- Privileged session management
- Privileged account discovery
- Secure credential injection
- Automatic and scheduled password rotation
- Privileged session recording
- Checkout request approval

Please contact our Sales Team for more information.

Devolutions Gateway provides authorized just-in-time access to resources in segmented networks. It supports RDP, SSH, ARD, VNC, SCP, SFTP, PowerShell (WinRM and SSH), and embedded websites using Chrome. Key benefits include:

- Reduce exposure to internal network resources with just-in-time connections through the Devolutions Gateway.
- Replace static VPN and firewall rules with dynamic access rules controlled by Devolutions Server.
- Enhance security by giving remote access, or access to specific applications, in separate network segments on demand.
- Improve productivity by eliminating the need to update VPN or firewall rules for temporary access.

Devolutions Server and Remote Desktop Manager are required to use Devolutions Gateway.

Customers who install Devolutions Gateway with Devolutions Server (i.e., "side-by-side installation"), may launch up to 5 concurrent sessions without purchasing a Devolutions Gateway license.

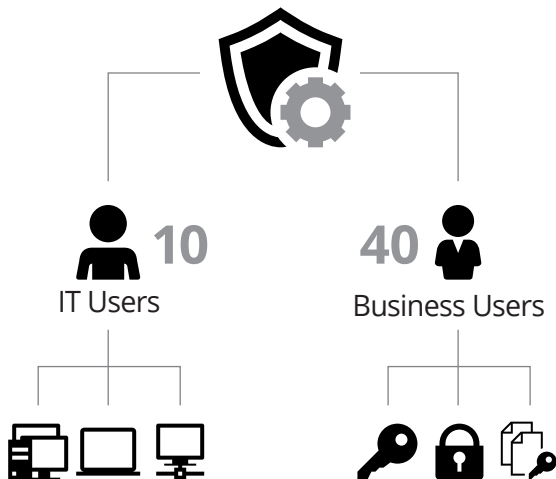

Customers who want to install more than one Devolutions Gateway, or who want to launch 6 or more concurrent sessions, will need to purchase a Devolutions Gateway license.

Please contact our Sales Team for more information.

Subscription Case Scenario

"My company needs a password management solution and I have 50 users – 10 of them are IT users that would need to launch connections and 40 of them are business users that only need to share and manage their passwords."
